About Us

Osian Infotech Pvt. Ltd. centers on the idea of helping businesses make meaningful connections with their customers. The founders combined strategy and technology expertise and set out to create a better way. We work with our customers from strategy to execution to get to know their business, understand the industry, and help foster growth. For over a decade, we have worked with some of the world's most forward-thinking, independent businesses and multinational enterprises. We are compact, agile and faster than the bigger agencies and not willing to sacrifice personal attention for scale.

That's our story. Now let's hear yours.

Job Description

We are looking for a Front-End Web Developer who is motivated to combine the art of design with the art of programming. Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application. You will work with the UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

Responsibilities

- Design and develop high-volume, low-latency applications for mission-critical systems, delivering high-availability and performance
- Contribute in all phases of the development lifecycle: concept, design, build, deploy, test, release to app stores and support.

- Diagnose performance issues, fix bugs (including crashes and ANRs) to increase the functionality of the application
- Write well designed, testable, efficient code
- Ensure designs are in compliance with specifications
- Prepare and produce releases of software components
- Support continuous improvement by investigating alternatives and technologies and presenting these for architectural review
- Collaborate with team members (product managers, developers, designers) to brainstorm about new features and functionalities.
- Stay up-to-date with emerging technologies

Skills And Qualifications

- B. Tech, MCA, M. Tech degree in Computer Science Engineering or a related subject
- Proficient in Java/Kotlin programming
- Knowledge and experience in Flutter Framework and DART programming
- Understanding of web markup, including HTML5, CSS3
- Basic understanding of server-side CSS pre-processing platforms, such as LESS and SASS
- Hands on experience in using RESTful APIs
- Hands on experience in designing and developing microservices architecture and containers
- Object oriented analysis, UML and design using common design patterns.
- Hands on experience in development IDE Android Studio, Android SDK, Firebase Test Lab
- Experience with offline storage, threading, and performance tuning
- Familiarity with push notifications
- Familiarity with IOS integration with Flutter
- Experience using GitHub or similar environment
- Complete understanding of SDLC
- Experience with Agile development
- Experience with Material Design and Android UI design principles, patterns and best practices
- Good knowledge of adding third-party libraries
- Ability to understand business requirements and translate them into technical requirements
- Working knowledge of the general mobile landscape, architectures, trends, and emerging technologies

- A track record of delivering successful complex consumer product apps (finance apps, e-commerce apps)
- Critical thinker
- Ability to work remotely while ensuring a good work culture that fits with the team goals.

Criteria

Must have
• 3 to 5 years and above of experience in digital/web client side engineering and design including frameworks / technologies
• Web/UI technologies: JavaScript, ES6, HTML/CSS, Dart, any MVC/MVVM JS framework etc.

Good to have
• Web/UI Dev ecosystem and tools: Node JS, Web pack, Gulp, Jasmine / Mocha (Test Frameworks), packaging tools, etc.
• Mobile APP development (Android, IOS, React Native, Ionic), etc. would be an added advantage.
• Web APP development React JS / Angular / Vue, etc. would be an added advantage.
• Backend technologies: Python, Node, PHP, Java, work experience in any backend framework is a huge plus.
