About Us

Osian Infotech Pvt. Ltd. centers on the idea of helping businesses make meaningful connections with their customers. The founders combined strategy and technology expertise and set out to create a better way. We work with our customers from strategy to execution to get to know their business, understand the industry, and help foster growth. For over a decade, we have worked with some of the world's most forward-thinking, independent businesses and multinational enterprises. We are compact, agile, and faster than the bigger agencies and not willing to sacrifice personal attention for scale.

That's our story. Now let's hear yours.

Job Description

We're seeking a senior developer with experience who can supervise junior developers on projects and assist with various development tasks. Senior developers are responsible for developing code, evaluating data, and assisting in the design and implementation of software.

You should be able to display exceptional creativity and ingenuity, as well as the capacity to flourish in a high-pressure atmosphere and communicate effectively. Finally, you should have substantial software development expertise, be able to meet deadlines, and possess good analytical skills.

Responsibilities

- Evaluating analysis, problem definition, requirements, solution creation, and suggested solutions to determine operational feasibility.
- Examining code for correctness and functionality.
- Developing and executing design strategies.
- Keeping abreast of market trends and technological advancements.
- Develops documentation, flowcharts, layouts, diagrams, charts, code comments, and clean code to explain and demonstrate solutions.
- Develops documentation, flowcharts, layouts, diagrams, charts, code comments, and clean code to explain and demonstrate solutions.
- Design DB Design and architecture.

Criteria

Must have
• Python / Java (Flask/Django, Spring Boot, etc).
• React JS / React Native / Flutter.
• Relational Database (Mysql/Postgres, etc).
• No SQL technologies (Dynamo, Mongo, etc).
• 5+ years of software development and implementation experience.
• Excellent teamwork and communication abilities are essential.
• Hands-on experience with SQL queries.
• Extensive experience writing customized code for multiple projects at the same time.
• Knowledge of UI /UX is essential.

Good to have

• Deep understanding of microservices architecture.
• Understanding of DevOps capabilities like containerization such as Docker or Kubernetes, CI/CD, etc.
• Serverless frameworks and ability to grasp distributed architecture.
• Server Management skills.
• AWS expertise.
