About Us

Osian Infotech Pvt. Ltd. centers on the idea of helping businesses make meaningful connections with their customers. The founders combined strategy and technology expertise and set out to create a better way. We work with our customers from strategy to execution to get to know their business, understand the industry, and help foster growth. For over a decade, we have worked with some of the world's most forward-thinking, independent businesses and multinational enterprises. We are compact, agile, and faster than the bigger agencies and not willing to sacrifice personal attention for scale.

That's our story. Now let's hear yours.

Job Description

We're searching for an enthusiastic Software Engineer with hands-on experience using web technologies - Django, Flask, etc to help us design, build, and deploy software solutions.

Our ideal candidates should be able to comprehend the client's business needs and design and construct appropriate solutions that follow industry best practices.

Responsibilities

- While leading a small team, assist and train younger and less experienced team members.
- Conduct root cause analysis of issues with the help of experienced team members.

- Perform unit testing and review new and old code.
- Maintain all software in a professional manner and generate updates on a regular basis to answer customer and company concerns.
- Create technical documentation for reference and reporting purposes.

Criteria

Must have

- Python (Flask/Django, etc).
- Relational Database (Mysql/Postgres).
- 3-5 years of software development and implementation experience.
- Excellent teamwork and communication abilities are essential.
- Hands-on experience with SQL queries.
- Extensive experience writing customized code for multiple projects at the same time.

Good to have.

- Understanding of microservices architecture.
- DevOps capabilities include a basic understanding of containerization such as Docker or Kubernetes
- Serverless frameworks and ability to grasp distributed architecture.
- Frontend technologies: Knowledge of front-end technologies such as Angular, React, Flutter is a huge plus.
- No SQL technologies (Dynamo, Mongo, etc).
