About Us

Osian Infotech Pvt. Ltd. centers on the idea of helping businesses make meaningful connections with their customers. The founders combined strategy and technology expertise and set out to create a better way. We work with our customers from strategy to execution to get to know their business, understand the industry, and help foster growth. For over a decade, we have worked with some of the world's most forward-thinking, independent businesses and multinational enterprises. We are compact, agile and faster than the bigger agencies and not willing to sacrifice personal attention for scale.

That's our story. Now let's hear yours.

Job Description

We are looking for a Front-End Web Developer who is motivated to combine the art of design with the art of programming. Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application. You will work with the UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

Responsibilities

In general, you'll work closely with the design team, product management, and development teams to create elegant, usable, responsive and interactive interfaces across multiple devices. You will, therefore:

- Gain feedback continuously from users, customers, and colleagues
- Develop new user-facing features

- Monitor app performance, watch for traffic drops related to site usability problems and rectify any issues
- Write functional requirement documents and guides
- Create quality mockups and prototypes, ensuring high-quality graphic standards and brand consistency
- Turn UI/UX designs into prototypes, creating excellent interactions from designs
- Write reusable code and libraries (with matching documentation) to a standard which makes it quick and easy to maintain the code in the future
- Assure that all user input is validated before submitting to back-end
- Optimize applications for maximum speed
- Optimize applications for maximum scalability
- Design new features, or maintain old features
- Collaborate with back-end developers and web designers to improve usability
- Help back-end developers with coding and troubleshooting
- Stay up-to-date with emerging technologies

Skills And Qualifications

- Proficient understanding of web markup, including HTML5, CSS3
- Strong proficiency in JavaScript, including DOM manipulation and the JavaScript object model
- Basic understanding of server-side CSS pre-processing platforms, such as LESS and SASS
- Thorough understanding of React.js and its core principles
- Prior experience with popular React.js workflows (such as Flux, Redux, or Mobx)
- Familiarity with more current specifications of EcmaScript
- Good understanding of asynchronous request handling, partial page updates, and AJAX
- Understanding accessibility, i8ln and separation of concerns.
- Prior experience with data structure libraries (e.g., Immutable.js)
- Knowledge of isomorphic React is a plus
- Familiarity with RESTful APIs
- Familiarity with HTML / CSS
- GIT experience is a plus
- Knowledge of modern authorization mechanisms, such as JSON Web Token
- Familiarity with modern front-end build pipelines and tools
- Significant experience of debugging using JavaScript-based tools like Chrome Developer Console
- Proficient understanding of cross-browser compatibility issues and ways to work around them
- Experience with common front-end development tools such as Babel, Webpack, NPM, etc.
- Ability to understand business requirements and translate them into technical requirements
- A knack for benchmarking and optimization
- Ability to work remotely while ensuring a good work culture that fits with the team goals.

Criteria

Must have

- 3 to 5 years of experience in digital/web client side engineering and design including frameworks / technologies
- Web/UI technologies: JavaScript, ES6, HTML/CSS, React JS / Angular / Vue, any MVC/MVVM JS framework etc.

Good to have

- Web/UI Dev ecosystem and tools: Node JS, Web pack, Gulp, Jasmine / Mocha (Test Frameworks), packaging tools, etc.
- Mobile APP development (Android, IOS, Flutter, React Native, Ionic), etc. would be an added advantage.
- Backend technologies: Python, Node, PHP, Java, work experience in any backend framework is a huge plus.
